Experience

Technical Product Engineer

Present

Amagi Media Labs

Bangalore

- Monitor AWS services such as **MediaConnect**, **S3**, and **EC2** optimizing Cloudport operations and improving system uptime by **30%**.
- Adopt **Jenkins** and **kubernetes** for CI/CD pipelines and manage backend services of cloudport.
- Collaborated with major clients like **Samsung**, **Vizio** and **FOX** to deliver tailored cloud solutions.

AI Engineer Intern

Aug 2024 – Oct 2024

ResoluteAI Software

Remote

- Amplified AI performance by **25%** with deep learning models for predictive analytics, enhancing forecasting accuracy.
- Reduced processing time by **40%** for real-time computer vision tasks using refined **CNNs** and **YOLO**, achieving **95%** detection accuracy.
- Delivered **AI solutions** with interactive dashboards and advanced data analysis tools, resulting in a **30%** increase in data-driven insights.

Technical Skills

Languages: Golang, C/C++, SQL, Python

Libraries: Pandas, Numpy, TensorFlow, OpenCV, Mediapipe, Matplotlib, scikit-learn, Pillow, Streamlit

Tools: Git-Version Control, Linux, VS Code, Android Studio, PyCharm, Cloudport

Methodologies: Agile (Scrum, Kanban), JIRA, Confluence Sprint Planning, Backlog Management

Cloud Services: AWS (Lambda, S3, EC2, CloudFront), SaaS, PaaS, IaaS

Projects

ML-Based NutriScore Analysis | *Pandas, Tesseract, NumPy, Random Forest Regression*

Jul 2024 – Sep 2024

- Led preprocessing techniques that improved text clarity on nutritional labels by **30%**.
- Implemented **OCR** and **NLP** models to analyze nutritional data from product labels with **95%** accuracy.
- Analyzed over **10,000** food items from the OpenFoodFacts database, delivering insights that improved product nutritional value by **15%**.

Automated Conveyor Glass Bottle Detection | *Python, YOLOv5, OpenCV*

Jun 2024 – Jul 2024

- Trained a **YOLOv5** model on custom-labeled data to detect glass bottles on a conveyor belt, achieving **92%** detection accuracy after optimization.
- Applied **OpenCV** techniques to capture real-time video streams and identify bottles with high precision.
- Enhanced system efficiency by **92%**, processing up to **500 bottles per hour**.

Computer Vision Web Applications | *OpenCV, MediaPipe, Flask, Pycaw, Python*

May 2024 – Jun 2024

- Engineered hand-gesture-based volume control and virtual paintbrush web applications, achieving a **40%** reduction in system interaction time.
- Mapped hand gestures to system functions, including AI-driven digital drawing, with **98%** accuracy in gesture recognition for seamless real-time artwork creation.
- Developed a responsive user interface, enhancing interaction speed by **25%** and providing immediate feedback.

Education

SRM University

Modinagar, Delhi-NCR

Bachelor of Technology, Computer Science with Specialization in AI/ML

Sep 2021 – Jun 2025

GPA: 9.50

Certifications

AWS Cloud Foundation (AWS Academy), **AWS Machine Learning** (AWS Academy), **Introduction to Machine Learning** (IIT KGP), **Database Management System** (IIT KGP), **Computer Vision** (Kaggle), **Web Development** (Udemy), **Android Development** (Netcamp), **Computer Networks** (Netcamp), **Supervised Machine Learning: Regression and Classification** (DeepLearning.AI)
